

AV Robots in lessons

We have some students in school who are unable to attend lessons and on occasion, we are planning for them to access their lessons through a telepresence robot called AV1. AV1 enables them to partake in the vital education and social aspects of school from another area of the school.

The image above shows the AV1 robot in the classroom setting. AV1 sits in the classroom in place of the child, and the child can then join in lessons by listening, watching the teacher, asking questions, and participating in discussions. The child will be operating AV1 from a phone or tablet.

Live streaming

AV1 transmits a live stream, from the AV1 to the AV1 users' tablet. This means that no data is recorded. The live stream is end-to-end encrypted, meaning it is impossible for any external party to access the video/audio sent from the AV1. It is not possible to record or screenshot when using the AV1 app.

These security features are in place to protect your child who will be in the same class as AV1, as well as the child who is not able to attend the lesson. Normal safeguarding procedures operated to keep your child safe in school will continue to be applied.

Your child may well see one of these robots in their lessons. If you have any concerns or questions, please do not hesitate to let me know on 01527 585859 or chinnl@trinityhigh.net
